IMPROVED VERSION

1.32 series **(with fixed arms)** original design with plastic seat shell for high and middle back chair, but we receive some feedback from customers that the seat feeling is not so comfortable due to the seat depth is short and the assembly with a little hard to accomplish.

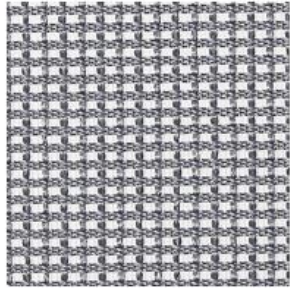

2. So our technical make some changes for this series chair, cancel the plastic seat shell and change to the molded foam with longer seat depth, which will be more comfortable seat feeling and suitable for the bigger people.

3. Cancel the plastic seat shell, the package size will be smaller, which will be saved the shipping cost.

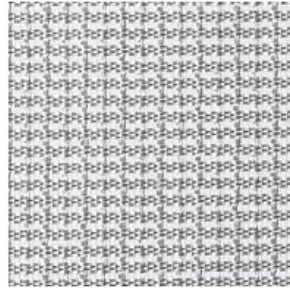

4. The prices for the two versions are the same.

5. 33 series **(with height adjustable arms)** don't make any changes (with plastic seat shell and cutting foam).
